CONTAINER PRODUCTS – 20/40FT DRY VAN CONTAINERS

Some months ago, when I was walking around a large shipping terminal in Waigaoqiao, Shanghai, I saw many colourful containers stacked together - which came from all over the world - looking like towering blocks of beautiful skyscrapers. From that time, I planned to make and place these cool iron boxes into my favorite simulator, making our experiences more awesome and more realistic.

Now, you will get a total of 10 styles of 20ft and 40ft dry van containers in your railroad world. You are able to carry them by X2K double-stack container well wagons.

Features Include:

- 10 styles.
- Normal Maps.

-
- Weathered.

X2K DOUBLE-STACK CONTAINER WELL WAGONS

If you intend to travel between Shanghai and Beijing by train, maybe you'll pass a train with double-stacked containers - chances are it will be these, as the X2 series well wagons are the only double-stack container wagons in China.

The X2 series double-stack container well wagon is specially designed to carry container traffic. Once a X2 wagon equips ZK6 bogies, it's called "X2K", and its max speed is up to 120 km/h.

Three colors of X2K wagons are included, which should be mixed in a long train for a more realistic effect!

Features Include:

- Normal Maps.
- Weathered.
- Rear Sign Light.
- Load Product.
- LOD System.

CONTAINER YARD

Need a place to show off your containers? Here it is. This original container yard references the Luchaogang container yard. It's a new yard

in Shanghai, used to storage containers which were carried from Yangshan Deep Water Port and transit by trains. Though its length has been reduced to 500 meters, and it can stack a maximum over 1,000 containers.

Features Include:

- Normal Maps.
- Weathered.
- Animate objects.
- Can stack over 1,000 Containers.

It's classic. And its very good.. This game is worth a buy. It's cheap, so why not? If you like Super Hexagon then it is very similar and just as enjoyable. I have completed 3/5 of the levels so far and do not think it is very difficult. I expect the last 2 to be more challenging, but nonetheless I think it's a fun arcade game that will keep you entertained every now and then when you're bored.. The only Alternate history is the one Where T Alberto Barbossa Ruled all of iberia. As a person who loves games like Chess... I don't think this game suffers from being slow. However, units are another story. I agree they could move a little faster. But the game is great!

I liked what I played, but I think I'll play it again when it's closer to full release :). **TOTAL RUBBISH - CRASHED MY STEAM AND SO FAR HAVE HAD TO REINSTALL THE SYSTEM TWICE NOW!!!**. This game is kinda hard for me.... or something got hard on me idk...

The artwork is nice.. Simple nice voxel car racing game great for a casual gameplay - extremely cheap - customize your car and race against the clock or against your friends

Ran across a bug in the game which won't allow me to combine tent poles with fence. The game is not hard, enjoyable for a point and click adventure, similar to the other two. However cannot play with game further without a fix so I can't recommend this game presently.. Avoid this game like the plague. Infact if you want this game, go get the plague first. The game does not work on most of the machines that I've tried to run it on. The developer I believe has given up on this game, they haven't been on steam for 99 days.

If the developer reads this, if you don't plan on doing anything more with it, can you open source it and place it on github so at least I can attempt to get it to work. I've never even played a single game.. So far I'm enjoying this. Old school Choplifter in a Minecraft setting. Simple aim is to fly helicopter, with very limited controls, and rescue troops and vehicles from enemy territory. You may need to shoot and/or avoid enemies at times as well. Charming with cool physics.

The controls are what will make you love or hate this game. Much like the old Lunar Lander/Thrust/Oids type games, you can only control left thrust, right thrust or both at the same time which makes you feel like you are trying to balance on a bowling ball. I enjoy the challenge, reminds me somewhat of the old Desert Combat Apache controls. But when it gets windy, it becomes extremely challenging to control, especially if you have the controls set to the professional option.

I nice diversion from all the modern popular 3d shooters everywhere, and a game that requires a bit of hand eye coordination.. Simple concept, yet very fun and challenging physics type of game. I see it as weird kind of platformer. Game starts quite easy, but increases in difficulty as you progress. What I like most about it beside the lovely aesthetics is the quick gameplay style that keeps you moving from one level to the next.

One cool feature is competing against the ghost of other players. While not technically a difficulty, there are different kinds of wisps, and each has its own speed. Speed can be a plus or minus depending on the level.

Game is short though, 2-3 hours. Just bare that in mind.. This game shows how to exactly NOT do VR.... Like other people already said: the story had potential, but it feels unfinished and the gameplay has issues. I found it very easy to do the tasks, there was no challenge at all. Also, the interaction part with the girls felt so shallow. I hope that the gameplay will improve in the next episodes, because really, there's not so much to do even tho the characters are making a game.

Oh, and the art style is quite pretty. But the BGM is annoying, I had to turn it off because it's basically the same song over and over again

3/10.. This game is full of♥♥♥♥♥♥
